## **Introduction to Cyber Security**

## **Multiple Choice Question**

- 1. What is the primary purpose of the OSI model?
  - a. Define hardware specifications
  - b. Standardize network protocols
  - c. Establish encryption standards
  - d. Develop programming languages
- 2. Which layer of the OSI model is responsible for logical addressing and routing?
  - a. Data Link Layer
- b. Network Layer

c. Transport Layer

- d. Physical Layer
- 3. The authentication to be affected by use of asymmetric crypto system and hash function is known as :
  - a. Public key

- b. Private key
- c. Digital signature
- d. E-governance
- 4. What is the purpose of ARP (Address Resolution Protocol)?
  - a. Translate IP addresses to MAC addresses
  - b. Translate MAC addresses to IP addresses
  - c. Encrypt data during transmission
  - d. Control access to network resources
- 5. Which protocol operates at the Transport Layer and provides reliable, connection-oriented communication?
  - a. TCP (Transmission Control Protocol)
  - b. UDP (User Datagram Protocol)
  - c. IP (Internet Protocol)
  - d. ICMP (Internet Control Message Protocol)
- 6. What is the purpose of DNS (Domain Name System)?
  - a. Encrypt data
  - b. Translate domain names to IP addresses
  - c. Control network traffic
  - d. Authenticate users
- 7. Which of these is a technique that is used to verify a message's integrity?
  - a Message Digest

- b. Protocol
- c. Decryption algorithm
- d. Digital signature

8.	Which device operates at the Data I	Link Layer and filters traffic based on MAC addresses?	
	a. Router	b. Hub	
	c. Switch	d. Repeater	
9.	What is the purpose of a subnet mast a. Identify the network portion of and b. Translate domain names to IP add c. Control access to network resourced. Determine the physical location of	n IP address dresses ces	
10	a. By comparing files against a list of b. By blocking files that copy thems c. By blocking all unknown files d. By looking at files for virus-like by looking at files for virus-like by	of known virus profiles selves	
11.	a. FTP (File Transfer Protocol) b. SMTP (Simple Mail Transfer Protocol) c. HTTP (Hypertext Transfer Protocol) d. UDP (User Datagram Protocol)	otocol)	
12.	<ul><li>12. What is the primary function of a firewall in a computer network?</li><li>a. Encrypt data</li><li>b. Block unauthorized access</li><li>c. Translate domain names to IP addresses</li><li>d. Accelerate network traffic</li></ul>		
13.	. Which of the below malware types do nearly everything he wants with a. RATs c. Rootkits	permits the hackers to access administrative controls and the infected systems? b. Worms d. Botnets	
14.	. Which type of network topology co a. Bus c. Star	onnects all devices in a linear sequence? b. Ring d. Mesh	
15.	. Under which section of the IT Act, s cybercrime. a. Section 69 c. Section 67	stealing any digital asset or information is written a  b. Section 65 d. Section 70	

16. What is the default protocol used for web browsing? a. FTP b. TCP			
	c. HTTP	d. IP	
17.	In TCP/IP, which layer is responsible a. Data Link Layer c. Transport Layer	le for logical addressing using IP addresses? b. Network Layer d. Application Layer	
18.	Which cryptographic algorithm is commonly used for secure communication over the internet, such as in HTTPS?		
	a. MD5 b. AES	b. DES d. RSA	
19.	19. What is the purpose of DHCP (Dynamic Host Configuration Protocol)?  a. Translate IP addresses to MAC addresses b. Assign dynamic IP addresses to devices on a network c. Provide secure communication between devices d. Control access to network resources Answer: b. Assign dynamic IP addresses to devices on a network		
20.	Which networking device operates a application-layer data? a. Hub c. Firewall Answer: c. Firewall	at the Application Layer and filters traffic based on b. Router d. Switch	
21.	21. Any person who intentionally destroys or alters any computer source code, when it is required to be kept by law, is said to commit the offense and is punishable with  a. imprisonment up to 4 years  b. imprisonment up to 3 years or fine up to 2 lakhs or both  c. fine up to 4 lakhs  d. imprisonment up to 1 year  Answer: b		
22.	What method do most IDS software a. Anomaly detection c. Intrusion deterrence Answer: a	e implementations use? b. Preemptive blocking d. Infiltration	
23.	Which protocol is responsible for domainer without guaranteeing delivera. TCP	elivering data packets to their destination in a best-effort ery?  b. UDP d. ICMP	
24.	What is the primary purpose of crypa. Compression of data b. Ensuring data integrity	otography?	

	c. Securing communication by conv d. Increasing data transfer speed	verting data into a secret code		
25.	What is the primary purpose of a cryptographic hash function?			
	a. Data encryption	b. Digital signatures		
	c. Password storage	d. Data integrity verification		
26.	Authentication is  a. To assure the identity of user on a b. Insertion c. Modification d. Integration	a remote system		
27.	2. Which cryptographic technique uses a single key for both encryption and decryption?			
	a. Symmetric encryption	b. Asymmetric encryption		
	c. Hashing	d. Digital signatures		
28.	Using spy cameras in malls and shops to capture private parts of any person comes under of IT Act, 2008.			
	a. Section 66	b. Section 67		
	c. Section 68	d. Section 69		
29.	This is the concept for guiding information security policy within a corporation, firm, or organisation. What exactly is "this" in this context?			
	a. Confidentiality	b. Non-repudiation		
	c. CIA Triad	d. Authenticity		
30.	What is the purpose of a digital signa. Encrypt data b. Ensure data integrity c. Authenticate the sender of a mess			
	d. Generate random keys			
31.	In public-key cryptography, which key is used for encryption?			
	a. Private key	b. Public key		
	c. Session key	d. Master key		
32.	What is a hash function used for in a. Encrypting data	cryptography?		
	b. Digital signatures			
	c. Ensuring data integrity			

d. Public-key encryption 33. Assessing Computer without prior authorization is a cyber crime that comes under\_\_\_\_\_ a. Section 65 b. Section 66 c. Section 68 d. Section 70 34. Which algorithm is commonly used for secure data transmission over the internet, providing secure communication through encryption? b. RSA a. SHA-256 c. AES d. HMAC 35. What type of cybercrime, its laws and punishments do section 66 of the Indian IT Act holds? a. Putting antivirus into the victim b. Stealing data c. Cracking or illegally hacking into any system d. Stealing hardware components 36. What is the purpose of a nonce in cryptographic protocols? a. Ensuring data integrity b. Creating digital signatures c. Preventing replay attacks d. Encrypting data 37. Which cryptographic attack involves trying all possible combinations of a key until the correct one is found? a. Brute-force attack b. Man-in-the-middle attack c. Dictionary attack d. Spoofing attack 38. What can you do with a firewall to help protect against virus attacks? a. There is nothing you can do on the firewall to stop virus attacks. b. Shut down all unneeded ports. c. Close all incoming ports. d. None of the above. 39. The Information Technology Act 2000 is an Act of the Indian Parliament notified on a. 27th October 2000 b. 15th December 2000 c. 17th November 2000 d. 17th October 2000

40. What is the key difference between symmetric and asymmetric encryption?

a. Symmetric uses one key, and asymmetric uses two keys.

c. Asymmetric uses one key, and symmetric uses two keys.

b. Symmetric is faster than asymmetric.

41. A key logger is what type of malwa				
a. Virus	b. Buffer overflow			
c. Trojan horse	d. Spyware			
42. What is the updated version of the I	12. What is the updated version of the IT Act, 2000?			
a. IT Act, 2007	b. Advanced IT Act, 2007			
c. IT Act, 2008	d. Advanced IT Act, 2008			
43. What is the primary goal of cyberse	curity?			
a. Enhancing network speed				
b. Ensuring data availability				
c. Protecting against unauthorized a	ccess and attacks			
d. Increasing software complexity				
44. Which of the following is an example of a strong password?				
a. 123456	b. Password			
c. <u>H@rdT0Gu3ss</u>	d. Admin123			
45. What is the purpose of a firewall in cybersecurity?				
	<ul><li>a. Encrypt data during transmission</li><li>b. Block unauthorized access and control traffic</li></ul>			
c. Authenticate users				
d. Monitor system performance				
46. What is the role of antivirus softwar	re in cybersecurity?			
a. Secure network communication				
b. Encrypt data at rest				
c. Detect and remove malicious soft	c. Detect and remove malicious software			
d. Control access to network resour	ces			
47. Child pornography is an offence under section				
a. 67 C	b. 67 A			
c. 67 B	d. 67 D			
48. Which cybersecurity concept involv	ves providing the least amount of privilege necessary to			
48. Which cybersecurity concept involves providing the least amount of privilege necessary t perform a job function?				
a. Encryption	b. Least Privilege			
c. Two-Factor Authentication	d. Network Segmentation			

d. Asymmetric is less secure than symmetric.

- 49. What is the purpose of biometric authentication in cybersecurity?
  - a. Encrypting user data
  - b. Authenticating users based on unique physical characteristics
  - c. Detecting phishing emails
  - d. Managing firewall rules
- 50. What does the term "phishing" refer to in the context of cybersecurity?
  - a. Hacking into computer networks
  - b. Social engineering attacks using deceptive emails or messages
  - c. Encrypting data for security
  - d. Blocking malicious websites
- 51. What is the purpose of a VPN (Virtual Private Network) in cybersecurity?
  - a. Protecting against malware
  - b. Securing wireless networks
  - c. Providing a secure, encrypted connection over the internet
  - d. Authenticating users
- 52. What is the primary function of SIEM (Security Information and Event Management) systems?
  - a. Detecting and responding to security incidents
  - b. Encrypting data at rest
  - c. Managing user authentication
  - d. Blocking malicious websites
- 53. Which cybersecurity measure involves regularly updating software and systems to patch known vulnerabilities?
  - a. Two-Factor Authentication
  - b. Intrusion Detection Systems
  - c. Security Auditing
  - d. Patch Management
- 54. What is the purpose of a CAPTCHA in online security?
  - a. Encrypting user data
  - b. Blocking phishing attacks
  - c. Authenticating users
  - d. Differentiating between humans and automated bots
- 55. Which type of attack involves overwhelming a system or network with traffic to make it unavailable to users?
  - a. Phishing
  - b. DDoS (Distributed Denial of Service)
  - c. Man-in-the-Middle

- d. Ransomware
- 56. What is the purpose of encryption in cybersecurity?
  - a. Authenticating users
  - b. Protecting data confidentiality
  - c. Blocking malware
  - d. Monitoring network traffic
- 57. What does the acronym IDS stand for in the context of cybersecurity?
  - a. Internet Data Service
  - b. Intrusion Detection System
  - c. Information Delivery System
  - d. Internal Database Security
- 58. Which cybersecurity principle involves isolating different parts of a network to contain potential security incidents?
  - a. Least Privilege

- b. Network Segmentation
- c. Two-Factor Authentication
- d. Security Auditing
